CONLAN
A SALTO GROUP COMPANY

GANTNER's vertical focus and strong innovation capabilities in access control, electronic locker locks, cashless payment systems and ticketing solutions have led to a unique growth story.

As an early pioneer in the field of RFID/NFC and contactless mobile technology, GANTNER'S hardware and software innovations have been transforming the way companies interact with their users and members for the past 35 years.

GANTNER, a SALTO Group company, includes solutions specialized in keyless access control, electronic locker locks, cashless payment, cash register and billing systems, staff time recording systems as well as ticketing and management software for the global leisure and commercial industries.

Excellence and performance have made GANTNER the choice for many leading companies and institutions in fields as diverse as leisure, retail, commercial, healthcare, education and government. Whether you run a fitness club, waterpark, spa or ski resort, corporate or educational facility, GANTNER has solutions that can be entirely tailored to any business needs. GANTNER creates a contactless environment where lockers can all be operated without using keys or cash.

GANTNER VERTICALS

GANTNER has had great success in the verticals they have focused on which they often refer to as FACE: Fitness, Attraction, Corporate, Education. Leading position in well-defined verticals with a deep understanding of customers' needs, delivering market-leading access control, electronic lockers, ticketing solutions and cashless payment systems for the global leisure and commercial industries.

- Improve security with a robust access control solution and keyless access.
- Go mobile and streamline operations with automated check-in management system.
- Benefit from superior locker room management.
- Boost income with cashless payment.

Fitness

Increased club security and flexibility.

Always with an eye towards the future, GANTNER provides innovative solutions that ensure your fitness club is mobile ready. With cutting edge technology, members enjoy a more convenient and secure visit to the club, while you see a quick return on investment thanks to reduced operating costs and increased secondary income.

Attraction

One complete and automated system to improve park experience.

Advanced admission control, electronic wardrobe locking solutions and cashless payment applications offer a seamless solution for the ultimate in-park experience. Improve your park's safety and security, including locker systems and cashless payments, ticketing solutions for a wide variety of leisure sites.

Corporate

Access control, end of trip, smart lockers and more for offices, healthcare and commercial.

Smart locker for storage, automated access control solutions for your main entrance or other restricted areas and time recording solutions for your employees, together with cashless payments systems at your canteens, restaurants or vending machines in an all-in-one management platform.

Education

Smart locking systems for universities and schools.

Add an extra layer of security for access to educational facilities with contactless, mobile, and NFC credentials for student lockers, access control, and cashless payment systems. Variety of solutions for main entrances, administration, student centers, and student lockers.

GANTNER

NETWORKED LOCKER SOLUTION

GANTNER has established a leading position in well-defined verticals with a deep understanding of our customers' needs, delivering market-leading access control, electronic lockers, ticketing solutions and cashless payment systems for the global leisure and commercial industries.

TERMINALS AND READERS: GT7 Generation

The newest generation of GANTNER readers outpace anything known so far in terms of access and check-in solutions. The GT7 product range offers numerous innovative and technological novelties, integrated into an elegant hardware design.

- Clear 4.3" colour display with intuitive touchscreen, with or without fingerprint reader.
- Contactless RFID reader for all common technologies, including NFC data carriers, smartphones via app.
- Simple installation and convenient plug & play start-up.

NET.LOCK: Powerful networked locker solution

Our patented networked locking systems offer a powerful option for mid to large size locker installations requiring a comprehensive locker management solution and integration with third party solutions. The keyless lock is equipped with an anti-theft protection and you have the opportunity to see how the lockers are used in real time. With the networked solution you have the opportunity to use in your locker the possibilities of charging your USB appliances or LED lighting.

- Single swipe and hassle free. Can be opened by NFC-enabled phones, cards, wristbands, and other third party credentials.
- No more worries about lost keys or paying deposits. Users access lockers that secure personal belongings. Vandal-proof installation.
- Smartphone app, enabling lockers to be locked or opened via the LockPal app, depending on the level of authorization granted.
- Increase revenue potential by renting out lockers.
- Third party integrations enable the fulfilment of a complete system solution.

GANTNER

CENTRAL LOCKER SYSTEM

The GAT SMART.Lock locking system is specially designed for the convenient electronic locking of logistical, postage, and storage applications. It combines the use of GT7 Terminal with the GAT SMART.Lock, and is managed by the powerful GAT Relaxx locker management software.

PARCEL LOCKERS:

Convenience for everyone

Depositing items at a central locker system and carrying a credential in hand for the assigned locker while entering a store is a very convenient way to collect parcels. Waiting in a long queue can be an irritating hassle and everyone wants the opportunity to avoid this.

- Store parcels in electronic lockers so that they are available for 24h, enabling customers to pick them up at any time.
- Efficient use of locker storage space, leading to cost reductions and enhances customer service experience.
- Using NFC-enabled Smartphone and NFC reader located wherever you want.

STRONGER

GANTNER

BATTERY LOCKER SOLUTIONS

Battery-operated locker locks from GANTNER are the ideal solution for small to medium-sized facilities that want to benefit from a secure, easily retrofitted electronic lock. It is operated using an RFID data carrier, PIN code, or smartphone (if desired, integrated into a customer-specific app, such as a workplace or campus app). There is also the option of app-based operation of the locks via smartphone.

ECO.SIDE LOCK:

Battery-powered and sleek

GAT ECO.Side Lock is the world's first battery lock to include up to a 10-year battery life, alarm function, and complete in-locker mounting. With no external door parts, GAT ECO.Side Lock is vandalism-proof and sure to fulfill the high aesthetic demands of owners and architects. The GAT ECO.Side Lock can be connected to the Relaxx management software via radio transmission so that important status information can be accessed centrally at any time and you always have an overview of your system.

- Battery life of up to 10 years (due to low energy consumption).
- Configurable with system keys or NFC mobile phones.
- Slim and elegant design due to full installation in the locker.
- Easy retrofitting with all locker materials.
- Multiple operation modes - free locker selection, personal locker or time limited locker.

ECO.LOCK:

Simple is effective

GAT ECO.Lock 7xxx is the ideal solution for customers seeking a cost-effective, battery-operated electronic locking system for lockers. GAT ECO.Lock 7xxx can be safely opened and closed by simply pressing a credential to the lock's button.

The GAT ECO.Side Lock can be connected to the Relaxx management software via radio transmission so that important status information can be accessed centrally at any time and you always have an overview of your system.

GL7P LOCK:

Battery-powered plus pin-code

The GL7p is a battery-powered, electronic RFID locker lock that is available with and without PIN-code keypad. The innovatively designed lock is the ideal solution for the realization of a cost-effective, secure, and intuitive electronic locker system for the safe storage of personal belongings.

The GL7p lock is suitable for almost every type of locker material and requires no cabling. They are straightforward to retrofit in existing locker systems - previous mechanical lock mounting holes can be easily reused.

GANTNER

LOCKER MANAGEMENT SOFTWARE

The software solutions of the eLoxx Suite serve the central control in the background: From the management of authorizations, which enables the use, to the monitoring and visualization of a GANTNER smart locker system. Customers have the opportunity to choose exactly the solution that best suits their needs.

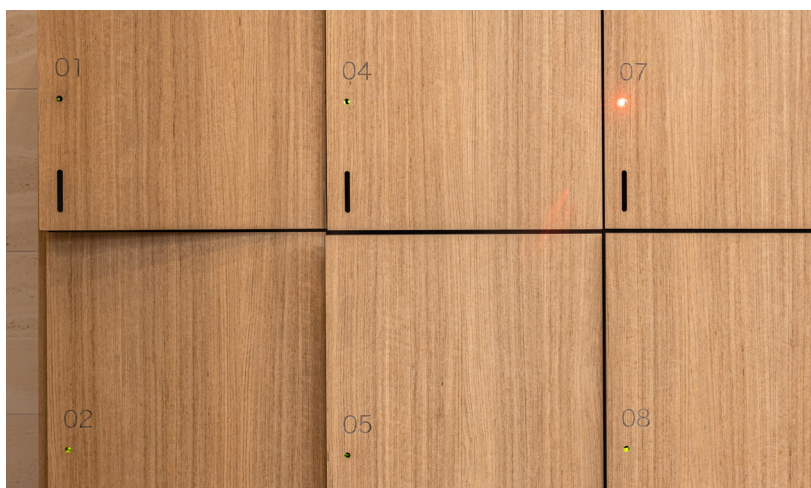

eLoxx one:

Control centrally and simply

With eLoxx one, GANTNER offers the most innovative software solution for all those who want a centrally-powered smart locker system without having to set up the corresponding IT infrastructure, such as a server or cloud connection.

The heart of the solution is the unique GC7 Controller, which becomes the control and management center of the smart locker system through the Main Controller App with the extension module eLoxx one. Our centrally-powered NET.Lock locks can thus be organized securely, conveniently, and straightforwardly via PC or tablet. The software required for this runs completely on the corresponding locker controller. Thus, customers get a fully integrated, centrally controlled, and web-based locker locking system without much effort and a server. Applications for this would be, for example, a small gym or smaller office premises.

- Simple local solution up to 192 lockers.
- Fully web-based setup, configuration and operation.
- Locker management software embedded in the GC7 Locker Controller.
- Integrated database.

RELAXX: Powering the networked and centralised locker solutions

Relaxx is a powerful PC software that is used to manage networked locker systems such as the GAT NET.Lock 70x0 and GAT SMART.Lock 7000. Thanks to the user-friendly interface, the Relaxx operator can easily monitor and control the utilization of the available lockers as well as control and configure the lockers remotely from their workstation. A break-in monitor (alarm indicator) instantly displays any unauthorized accessing of lockers to ensure the secure storage of personal belongings is maintained.

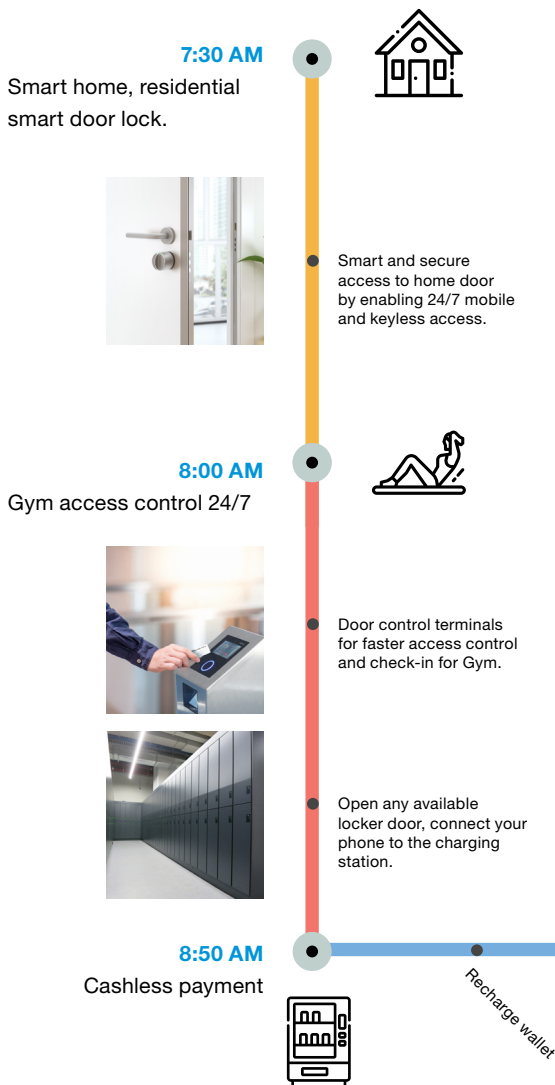

- Manage vast multi-site enterprise solutions from a single location.
- Locker control is possible also via the innovative LockPal mobile app.
- Lockers can be organised into groups and areas, allowing for regional and per-floor control.
- All locker activity data is recorded.
- Open API enables integrations to existing systems, creating a complete solution.

SALTO + GANTNER JOIN FORCES

Create delightful keyless experiences across all building door touchpoints to streamline user experience, accessibility, mobility and interactions with a simplified and integrated approach.

SALTO's and GANTNER's highly similar innovative and talent-oriented cultures will be a key enabler in the integration. Together, we will deliver an increase in automated processes, mobile key provisioning, cashless payments, data analysis with automatic event triggering and the use of smart access technology to help resolve Prop. Tech. issues, mobility issues, and new reality safety challenges and issues to adapt to new safety, security, and operations practices.

SALTO AND GANTNER TO JOINTLY FACE AN EVER-CHANGING FUTURE.

SALTO is a global leader in the development and manufacture of world-class access control solutions. The company revolutionized access control with a pioneering approach that featured the first stand-alone, battery-powered electronic lock; the SALTO Virtual Network (SVN) data-on-card technology; and the first wireless access control system that combined a stand-alone locking device with online, real-time capabilities — all without using wires or mechanical keys.

SALTO has expanded its portfolio to include world-class software management, cloud solutions, and mobile applications. With the addition of the GANTNER portfolio, SALTO will now have the combined strength of more than one million access points worldwide annually.

With a total workforce now of 1.200 employees spread across 40 countries all around the globe, SALTO and GANTNER are ready and willing to accomplish new growth projects together.

VERTICAL MARKETS

Highly complementary vertical focus and expertise across markets.

CUTTING EDGE PRODUCT PORTFOLIO

Best-in-market electronic locking solutions and access control solutions with a unique portfolio combination.

GLOBAL PRESENCE

The collaboration of our best in class international teams will reinforce our already remarkable global strength.

9:00 AM

Access to workplace

17:30 PM

Leisure and entertainment

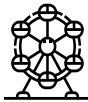

Highly-adaptable solution to your system that provides access to the floor-linked to user access rights.

Provide access control smart credentials to those needing general entry into your working space.

Access can be restricted to general areas and meeting rooms or provided to gain entry into a private office.

Access control can even extend beyond the doors to the car park.

Ticketing, booking and payment experience by making cashless payments quick, secure, and digital.

THE RIGHT PARTNER

If your security and risk management is posing a challenge, and you're considering a move to an electronic access control system, it's essential to choose the right partner. One who understands your needs and the technology that will best meet them. A partner who has worked with establishments just like yours and helped them reap the benefits of electronic access control.

Talk to us about how we can help.
