SMART LOCKS FOR RETAIL

SALTO Systems is helping retailer businesses simplify their access management workflow to increase productivity, security and operations efficiency — in shared, single, and multiple locations.

Making every access matter.

www.saltosystems.com

SALTO
inspired**access**

Since 2001, SALTO Systems has been delivering state-of-the-art, wire-free, mobile and keyless electronic access control solutions and has established a very strong presence in the retail industry. By developing innovative and reliable electronic locking products that help retail establishments simplify access management workflow, SALTO has helped retail businesses increase productivity, security, and operations efficiency in shared, single, and multiple locations.

SALTO delivers profit-driven keyless smart access for retail. Businesses can connect SALTO with management and security software (BMS) and third-party systems to automate tasks and connect alerts. Save time and money with quick installation on almost any type of door and access point. Achieve faster onboarding for new staff members by sending keys even before their first day.

Say goodbye to mechanical keys and the cost of replacing them and the worry associated with lost keys. Control who goes where – and when – for any or all retail locations. And when expanding to new properties, affordably scale and establish access management across a number of properties.

ABOUT US
SALTO SYSTEMS

SALTO Systems revolutionised access control with the introduction of the SALTO Virtual Network SVN data-on-card technology and the advanced battery-operated wireless electronic smart door lock range in 2001. For 20 years SALTO has been synonymous with innovative solutions – including stand-alone, cloud-based and mobile applications – that set new standards in security, manageability, flexibility, and design that bring real-world benefits to virtually any door and building type. Across a broad range of industries and applications, SALTO is widely recognised as a global market leader in smart electronic access control solutions.

OUR PURPOSE

SALTO Systems develops and manufactures advanced and reliable wireless electronic locking and access control smart solutions that provide a smoother, more comfortable, and secure daily life for the people using our systems.

We bring added value to our clients, making it easier for decision making and smarter management of facilities. Our goal is to not only be within the top three companies in our sector in the world, but to also be your number one smart electronic access control provider. As an organisation, we intend to create an ecosystem of end-users, clients, partners, collaborators, and suppliers with whom we build long-lasting, win-win relationships guided by closeness, flexibility, integrity, and trust.

We strive to be an attractive company for the people working at SALTO advantages, services, and attention that helps contribute to improving their personal and professional goals. We expect and appreciate efficient and responsible work but also the passion to provide best of breed solutions and cutting edge technologies to our customers.

At SALTO, we are aware that in addition to the products, technologies and services we deliver, we are part of a much broader framework. For this reason, we are committed to being responsible as it relates to the environment and sustainability This responsibility goes beyond corporate goals, being our firm compromise to keep alive a range of activities consistent with these principles continuously.

+1,500

Team

Professional team members who – with their work, passion, and talent – contribute to the creation of innovative technologies and solutions.

+210

R&D

Professionals dedicated to the engineering design and development of new technologies applied to access control and infrastructure management.
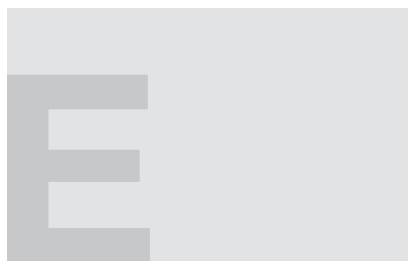

+40

Offices

A global international structure with 28 subsidiaries.

SUSTAINABILITY - ESG

Our commitment to Environmental, Social and Corporate Governance contributing to the application of circular economy principles.

SALTO Systems has undertaken a profound transformation towards an increasingly-sustainable model to respond to our environmental and social impacts, as well as to the main challenges faced by the access control and security market. By proactively responding to social issues, SALTO contributes to the achievement of specific SDG objectives through its responsible corporate policies.

ENVIRONMENT
Innovating to meet social and environmental challenges.

We adopt practices that minimize our carbon footprint, consume energy responsibly, reduce waste, and maximize resource usage and sustainability.

SOCIAL RESPONSIBILITY
Enriching communities and inspiring people.

We want people to be happy and communities to be strong which is why we collaborate with communities around the world to provide support to improve living conditions and help people

GOVERNANCE
Ethics and Compliance

Our commitment to contribute to sustainable development. Our Code of Conduct, Quality and Environmental Policy, Security Policy, and Health and Safety policy – apply to the way we do business and to our conduct with the communities in which we operate.

SOLUTIONS

MODERN ACCESS MANAGEMENT FOR RETAIL ENVIRONMENTS

Making every access matter, in every retail store.

Robust access control is vital for efficient, successful retail of any size or type — boutiques or big-box stores, owner-operated restaurants or fast-food chains, banks or financial services outlets.

Line managers must be freed from constant cries of "Can I have the keys?". Site managers must facilitate maintenance and deliveries, often outside of regular operating hours. Business owners must control stock and protect against fraud. Landlords must ensure only authorized personnel are on their premises.

These issues and more are easily managed with SALTO keyless smart access for retail. SALTO makes access control simple and secure and helps you grant specified access for your staff, suppliers, customers or even delivery services.
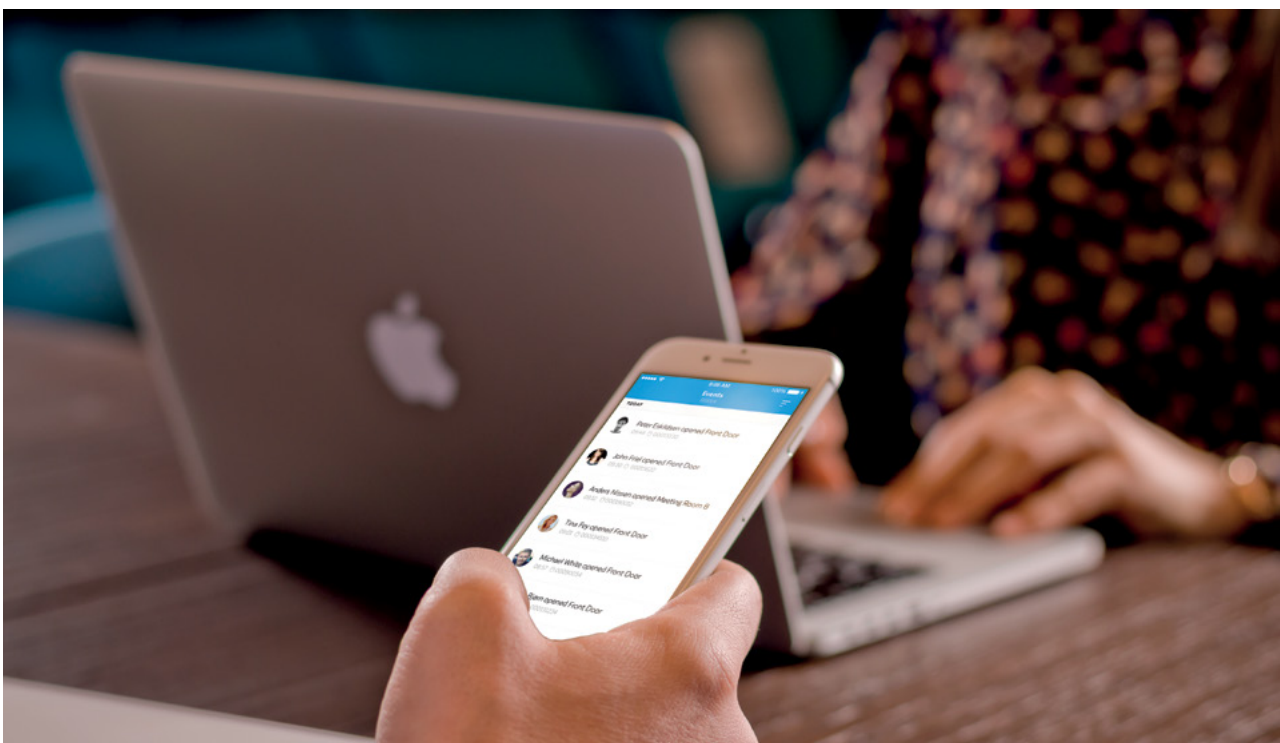

Control who goes where and when for any or all of your retail locations.

Scrap mechanical keys, replacement costs and lost-key security worries.

Affordably scale access management across multiple properties.

Monitor store operating hours and improve security.

Integrate with your existing retail business management applications and security systems.

SOLUTIONS FOR EVERY TYPE OF RETAIL STORE

SALTO KS HAS AN ACCESS CONTROL SOLUTION TO MEET ALL OF YOUR RETAIL STORE NEEDS:

01 MAIN ENTRANCE:
- Main Entrance Automatic Sliding Door

02 STORE AREA
- Emergency Exit

03 BACK-STORE
- Back-store access
- Emergency Exit
- Cash office access
- IT Room Doo
- Store office

04 STAFF ROOM:
- Staff Locker Rooms
- Locker Locks

05 WAREHOUSE:
- Warehouse store access
- Warehouse delivery access
- Emergency Exit

FOCUS AREAS

STREAMLINED OPERATIONS

Take control over access to your premises, optimize business processes and procedures, and spend more time on retail's core business of building relationships and growing sales.

Streamlining access control is essential to maximizing operations, increasing productivity, and enhancing employee and customer experiences.

STAFF EXPERIENCE

Improve your staff experience and simplify your access control. Empower employees with convenient, smart key access to the locations they need.

Add or revoke authorizations in real time.

— **Improve access management:** Define precisely who can enter or exit, through which access points, at what times to your staff, suppliers or delivery services by time of day, and day of week offering keyless and mobile access with the ability to remote access to open doors from anywhere.

— **Simplify and centralize security:** Add, delete or modify access permissions for multiple sites instantly from one location. Replace expensive-to-replace mechanical keys with mobile access, smart Tags or key fobs, or PIN codes.

— **Minimize installation and ongoing costs:** Upgrade access control with a one-time investment that takes hours, not weeks, using existing locks and doors.

— **Eliminate expensive rekeying** when staff members Avoid costs of re-keying when employees leave or lose a key.

— **Monitor business hours:** Get real-time verifiable data on opening and closing times — crucial to profitability for many high-volume, low margin retailers.

— **Quick and easy onboarding:** Equip new hires with smart keys before their first day. Reduce the cost of staff turnover and improve worker satisfaction.

— **Tailor access:** Support long-serving or high value staff, enjoy flexibility to grant individual access privileges to cash rooms, server rooms, back offices etc with digital key, Tags, or PIN code..

— **Improve responsiveness:** Support employees and supplies with the ability to grant access on demand, remotely.

— **Provide reassurance:** Give employees the peace of mind and confidence of working in environments protected with robust security during and after business hours.

FLEXIBILITY & SCALABILITY

Secure scalability through cloud-based application or on-premise (client/server) hosting options that deliver a flexible electronic locking infrastructure and smart access technology for retail access control and security.

With SALTO, it's easy to add new doors for as many locations as needed.

SECURITY & SAFETY

Enhance physical security and simplify your security plan. Keyless access control provides 24/7 insight activity which improves safety for customers and staff members.

Give employees the opportunity to have access to all Achieve reliable access control, physical security, and simplify your security plan.

— **Flexibility for growth:** Smart technology with modular design enables easy scaling for future business growth or add other locations. Upgrade your retail security and access control, without running expensive power, data cabling or replacing the existing door hardware.

— **Built to work on every door:** SALTO makes smart access possible on any door – however unusual – with a variety of finishes that ensures the design will match the unique character of your space.

— **Full integration with your software:** The SALTO platform can be integrated with your existing retail business management software that works with your time and attendance system or combined video surveillance management.

— **Long term solution:** Modular design and future-proof technology ensures for a system that will stand the test of time.

— **Support whenever, wherever needed:** Our worldwide network of trained and certified installers means you always have whatever support you need.

— **Real-time control:** Revoke terminated employees' access immediately, go into emergency lock-down, remotely adjust access permissions and schedules at any time.

— **Alerts:** Be alerted to after-hours access by authorized staff, restrict unauthorized team members, and compare access with employee schedules.

— **Security system integration:** Connect every access point to your security infrastructure. Integrate with third-party systems that work with all the tools you need to operate your retail business for a comprehensive security solution.

— **Monitoring:** Know when premises are open or closed and if they are operating to your schedule. Full control of who can access what, when, and where in real-time

— **Smart access delivers higher-security:** Grant specific access for your staff, suppliers or delivery services by time of day, and day of week offering staff keyless and mobile access with the ability to remote access to open doors from anywhere.

SALTO KS CLOUD-BASED ACCESS CONTROL SOLUTION

Proven reliability and recognised stability bring the option of cloud access control to every business, providing vastly better functionality and performance than is possible with a traditional mechanical solution. Cloud-based access control is a flexible solution that requires no software installation, nor the cost of a fully-wired electronic product. All you need is an online device with an Internet connection.

SALTO KS is built for any business looking to manage access in an easy and secure way. No matter your industry or the size of your business, we've got the cloud-based access control solution that fits your needs.

Understand the SALTO KS ecosystem.

SALTO KS is a simple, yet sophisticated and flexible cloud-based smart access control solution that fits the needs of your business today and tomorrow. The four parts of the SALTO KS - Keys as a Service - cloud-based access control solution are: Web & Mobile App, IQ, Electronic Lock & Smart Key.

WEB & MOBILE APP
EASILY GRANT SPECIFIC ACCESS

Have full control of all functions and features from the web app. And, while on the go, use the mobile app for keeping track of events, remote unlocking, and blocking.
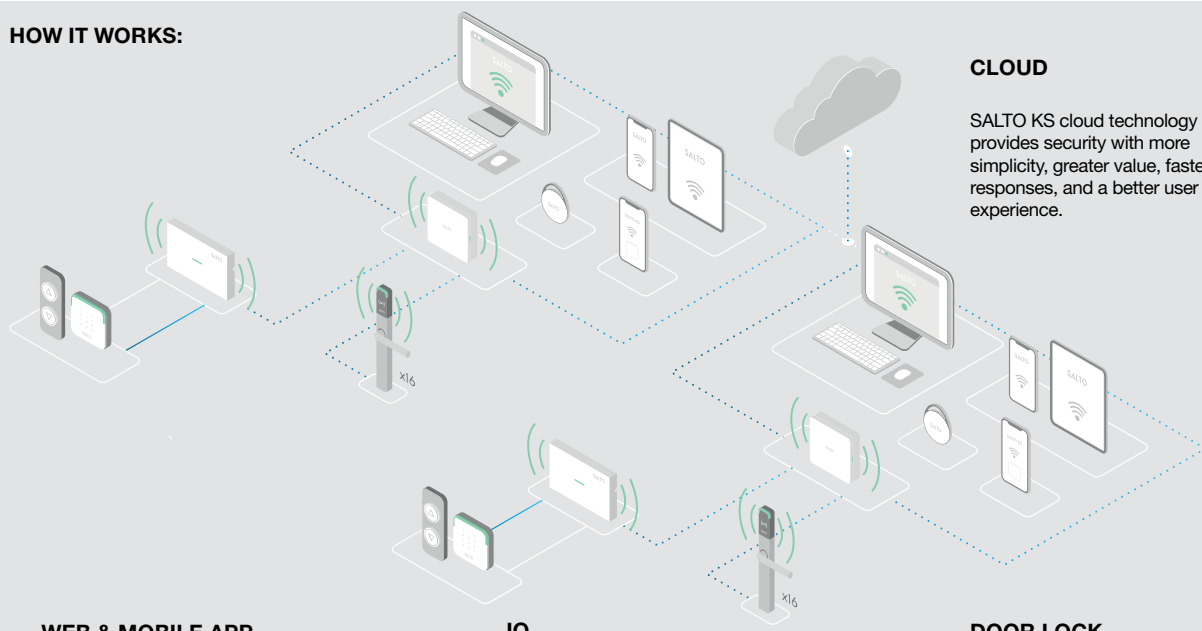

IQ
THE CENTRAL HUB OF YOUR SITE

The SALTO KS IQ receives all changes and settings from the SALTO KS application and ensures that all locks are updated within seconds. The IQ serves as the brain of your site, connects your wireless locks to the cloud, and can be extended by adding additional repeaters if needed.

HOW IT WORKS:

CLOUD

SALTO KS cloud technology provides security with more simplicity, greater value, faster responses, and a better user experience.

WEB & MOBILE APP

Your portal to your account, where you can create access groups, manage users, and view entries to your properties from your computer or mobile devices.

IQ

The IQ comes in different variants (Wi-Fi, PoE, cellular) to connect to the cloud and Bluetooth to connect to the SALTO KS smart lock.
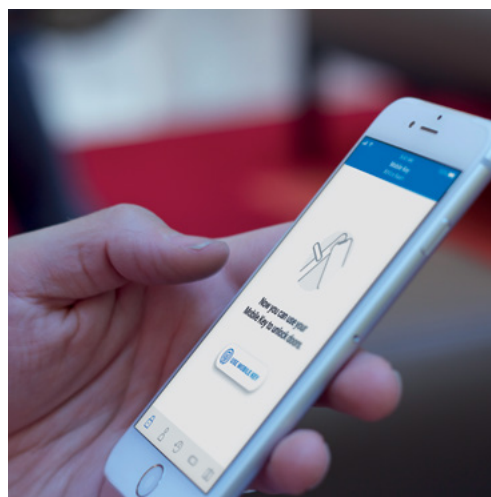

DOOR LOCK

The user smart Tag or mobile triggers the lock to engage within seconds so users or staff can enter easily and according to their access rights.

ELECTRONIC LOCK
WIRE-FREE & COMPATIBLE WITH YOUR DOOR

SALTO KS sites are equipped with wireless SALTO locks. SALTO locks can go on any door in the world, however unusual the door may be. SALTO offers a broad range of hardware including electronic locks or cylinders for main entry doors and internal meeting rooms and wall readers for all electric doors including gates. These solutions make smart access to any door possible.
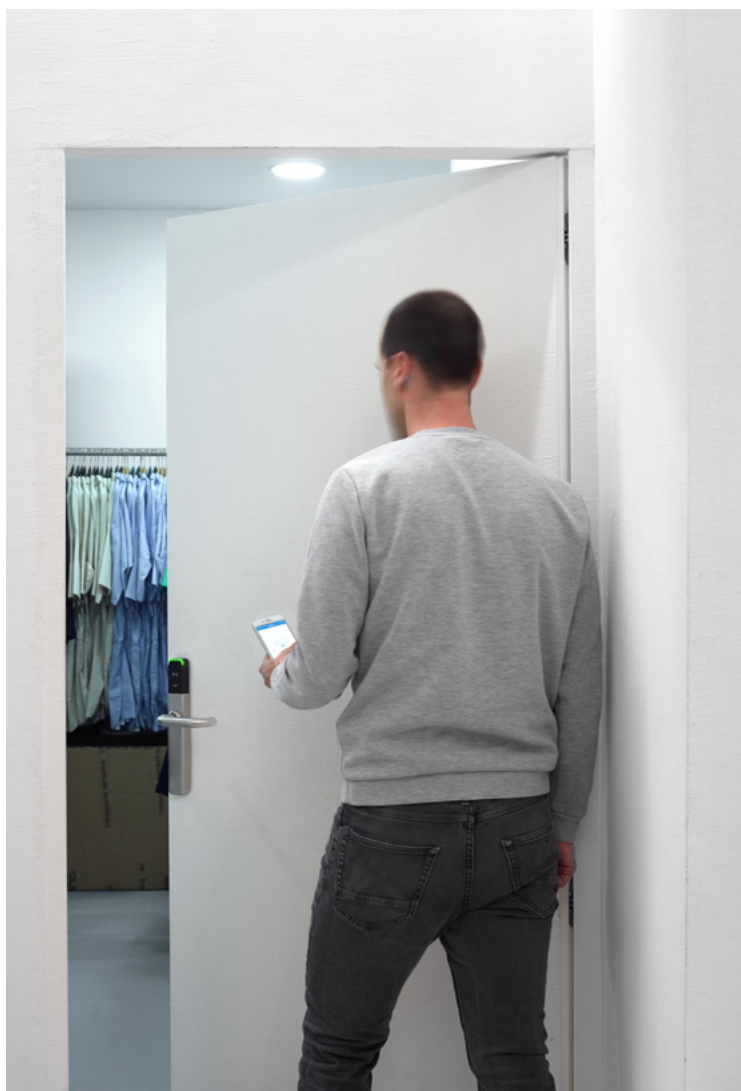

SMART KEY
MOBILE OR TAG ACCESS

You can always use your smartphone to unlock doors, but as a second credential you can also use Tags. A Tag is a physical device (contactless key fob) that works based on RFID. With a built in secured chip, an opening can be triggered by directly presenting the Tag to the lock.

WAYS TO UNLOCK

ACCESS MADE EASY AND SECURE

**Keep one smart tag with unlimited keys.**

Heavy keychains are now a thing of the past. With SALTO KS your staff can say goodbye to mechanical keys and collect all their access rights on a single smart Tag, which can be added as a guest to multiple systems as well. There's no need to make copies or replace the lock if keys are lost or stolen, mobile keys and Tags have never been more secure. Open your door via PIN code, smart key Tag, remotely, and even from your smartphone.

DIGITAL KEY

TAP AND UNLOCK WITH MOBILE KEY

With SALTO Bluetooth Low Energy locks you can unlock doors with Digital Keys. It's time to say goodbye to mechanical keys by a better and easier way to access. Users can receive keys anytime and anywhere, making issuing and receiving access rights much easier and more flexible.

SMART TAG

YOUR TRUSTWORTHY BACKUP

Tags replace that ring of keys and grant designated access to visitors, employees, or even delivery services. Simply assign a Tag and define when and where that Tag can go. If a Tag is lost, simply block and assign a new one, and even receive a notification if someone tries to enter with a blocked smart Tag.

PIN CODE

TYPE IN A PIN DOOR CODE

With the new SALTO door code locks, there is no need to carry any Tags. Type your PIN code and enjoy the convenience of unlocking your door using the smart lock keypad; or generate and assign a secure and unique PIN code for your guests to let themselves in — no matter where you are — and never worry about carrying or losing keys again.

REMOTE OPENING

OPEN DOORS FROM ANY DISTANCE

Let guests in more conveniently than ever. SALTO KS lets you open doors from anywhere, anytime. Whether it's a visitor who arrived earlier than you or a new employee without a Tag, you can unlock doors for your guests via remote opening functionality from anywhere around the world. All you need to do is swipe left!
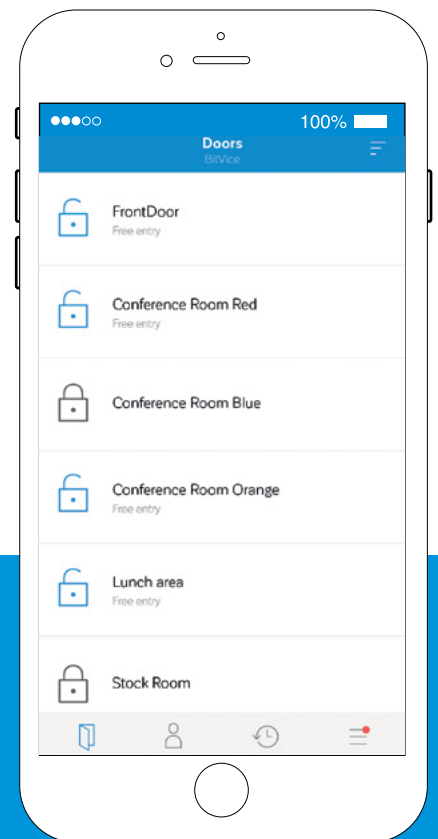

WEB & MOBILE APP

MANAGE USER ACCESS ANYWHERE, ANY TIME

SALTO KS is the perfect solution for any type of building facility because it gives management the capability to quickly assign access rights or delete them.

SALTO KS makes access control a smarter way to manage business access. Installation is easy and the solution is affordable – and can grow right along with your business. System administrators can forthwith and conveniently manage all user access through a simple and intuitive cloud-hosted access management web dashboard.

With SALTO KS manage user keys, monitor all activity, and assign different access levels from any device, anywhere, anytime.

MOBILE APP:

ENTRIES

View all entries and incidents or remotely open a selected door.

ALERTS

Be informed on entry activity with messages and notifications.

MOBILE ACCESS

Send or receive a mobile key to open any door or gate with your phone.

The SALTO KS mobile app allows SALTO KS users to remotely manage and monitor their door access activity across all their SALTO KS systems:

— Swipe-to-open doors.
— Block/Unblock user smart Tags, in case someone lost their keys.
— Oversee events on all doors across all systems.
— Verify and open doors and block users with Touch ID.
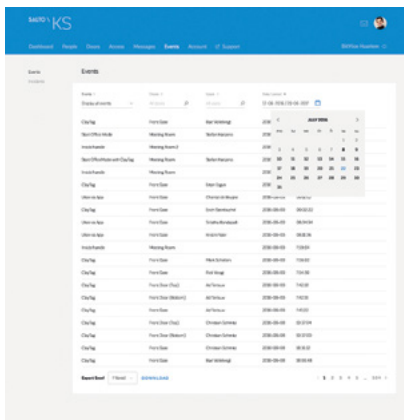

14

HOW DOES WEB APP WORK?

MULTI LOCATION

Manage multiple locations

SALTO KS offers an easier way to create and manage your retail business doors across multiple locations, simplifying the management of user building access.
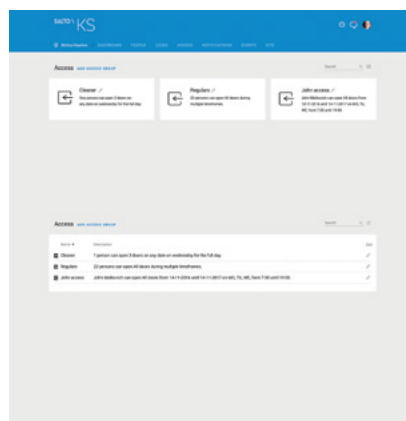

Centralize access management and meet your facility operation's changing needs across all locations with SALTO KS cloud-based fully wireless access control system.

EVENTS

24/7 real-time activity monitoring

Monitor all access activity 24/7 from any device in real-time. With SALTO KS you'll gain total visibility for all events and incidents related to your locks. From the web app, you can even set email or push notifications for specific events such as rejected entries, door left open, or low battery.

USERS

Managing access control with permissions and user roles

Create or invite users to your site in just a few simple steps. With the SALTO KS web app you can determine the role of each user:
- Owner / Admin
- Super user / Basic user

Decide which doors, and at what times, the user has access and determine their rights:
- Remote opening
- Offline access
- Office mode rights

You have full control for user management with SALTO KS.

ACCESS GROUPS

Access level restrictions

Different users need different access rights and are part of different user groups. You can assign Tags and send mobile keys to restrict access to selected users and groups to only have access to certain doors or locations.

PRODUCTS

SMART DOOR LOCKING PLATFORM FOR EVERY ACCESS NEEDS

SMART ELECTRONIC LOCKS DESIGNED TO BE SECURE

SALTO delivers an easy-to-use electronic locking platform that integrates all your physical security needs through smart, wireless, and battery-operated smart locks, giving you all the latest users' access information for virtually all of the doors in your facility.

SALTO offers a broad range of hardware, making smart access to any door possible. Designed to cover every access point type and with the latest technologies to protect against advanced attacks, SALTO's electronic locking platform technology leverages industry-leading security practices, including advanced encryption to provide users a secure and seamless keyless and mobile experience.

HELPING YOU EXPAND

With SALTO, it's easy to expand to a new room, floor, or as many locations around the world. SALTO's access control expertise and hardware quality allow it to work with with any door in the world, however unusual the door may be. With a worldwide network of trained and certified installers, you'll always have the support you need wherever you decide to expand.

ELECTRONIC LOCKS

With a large variety of models, electronic escutcheons fit virtually any door. They are also suitable for use at fire doors and emergency exits.

ELECTRONIC CYLINDERS

Extensive range of compact-sized electronic cylinders and profiles designed for doors where fitting an electronic escutcheon is not possible or required.

READERS AND DOOR CONTROLLERS

A complete range of readers and controllers facilitate the expansion of SALTO access control benefits to every door to provide your facility with a complete security solution.

DOOR COMPATIBILITY & STANDARDS

Totally wire-free and compatible with most European, Scandinavian, and ANSI mortise locks and tubular latches.

DESIGNED TO COVER EVERY ACCESS POINT

Extensive range of electronic locks, cylinders, and readers to cover all the needs of any type of building.

EASY TO INSTALL

Designed to be installed in doors with existing locks, with no need for additional modifications or wiring.

SECURE MOBILE ACCESS

Complete mobile-compatible electronic-locking platform makes it easy and secure to incorporate smartphones as a part of your access control solution.

SECURITY STANDARDS & CERTIFICATION

Industry security standards ensure the quality and durability of locks with extensive tests and certificates, defined benchmarks of operation, and security.

XS4 ONE

The SALTO XS4 One is the evolution of the Original model with a built-in, totally new reader available in two colours. This version is compatible with most European mortise locks and cylinders.

XS4 MINI

The XS4 Mini for Australian mortise locks has been designed for use with Australian mortise locks that use split spindle systems. It is perfect for interior uses.

ELECTRONIC LOCKS

DESIGNED TO FIT
YOUR BUILDING'S NEEDS.

With a large variety of models, XS4 electronic escutcheons blend attractive design and sophistication with strength and smart technology for your building. Applicable to exisiting standard doors, the XS4 makes it simple and fast to upgrade the traditional knob set without having to replace or drill the door.

All are totally wire-free. SALTO KS sites are equipped with wireless SALTO locks. SALTO locks can go on any door in the world, however unusual the door may be. SALTO offers a broad range of hardware, making smart access to any door possible. Compatible with most European, Scandinavian, and ANSI mortise locks and tubular latches.

The XS4 features high security protection via high resistance, hardened anti-drill plates to protect wiring and reader area. Additional protection is provided by hardened axes and floating steel balls in the handle area.

MAIN FEATURES AND BENEFITS

Low set-up cost and maintenance-reducing costs and time of installation. Easy to retrofit, installing a new SALTO KS smart lock is quick: simply change the handle set!

Large number of models, versions, and finishes making it suitable for a wide range of applications.

Specially designed for use on busy, high traffic doors that need additional strength and provides an ideal and reliable solution for outdoor, as well as indoor, use.

Communication between the user smart key, the physical network, and the electronic lock is encrypted and secured.

Battery-operated. Remote report and real-time battery-status of locks with low battery level.

Models for both inside and outside use availaible. Outside models are IP55 rated to endure the elements.

XS4 ORIGINAL+

The SALTO XS4 Original+ narrow body version is specially designed to fit most ANSI, Euro, and standard doors, even narrow profile framed doors.

XS4 ORIGINAL - KEYPAD

The SALTO XS4 Original electronic lock with keypad increases security and control, as it offers the choice of three forms of authentication to grant access.

XS4 EMERGENCY EXITS |

The SALTO XS4 advanced panic bar solutions enable emergency exit doors equipped with panic bars to be controlled with an innovative stand-alone electronic locking system.

SALTO NEO CYLINDER

The SALTO Neo Cylinder offers value far beyond security. Of course, upgrading a mechanical door to electronic access control enhances security, but the SALTO Neo Cylinder provides greater control of the door.

It offers end users mobile keyless access to any access point and wireless access to audit trails, reports, alerts, and user access rights updating with the latest SVN-Flex access control technology.

SALTO Neo Australian Oval half cylinder.

SALTO Neo EU profile with mechanical inside knob.

SALTO Neo EU profile double cylinder with inside electronic knob control.

ELECTRONIC CYLINDERS

DESIGNED FOR ANY KIND OF STANDARD DOORS

The compact SALTO Neo Cylinder is designed for doors where fitting an electronic escutcheon is not possible or required and can be installed on standard doors, server racks, gates, cabinets, electric switches, sliding doors, and more. It's available in an extensive range of models to suit almost any kind of door across the globe – from Europe to Scandinavia, ASIA to the Americas, and Australia.

SALTO Neo Cylinder technology allows us to introduce customers, systems operators, and installers to new experiences and to connect keyless access. The SALTO Neo Cylinder has more functionality and performance capability, allowing businesses to connect to their on premises network via advanced SVN technology or the cloud with the SALTO KS cloud-hosted access management platform.

For any building, function, or model, SALTO offers the perfect electronic cylinder to fit any door. The SALTO Neo Cylinder delivers an easy-to-use electronic locking platform that integrates all of the physical security needs through smart, wireless, and battery-operated smart cylinders, giving system operators all the latest user access information for virtually all of the doors in a facility.

MAIN FEATURES AND BENEFITS

Simple installation and adaptable with any previous mechanical cylinder model. No wiring or drilling work required.
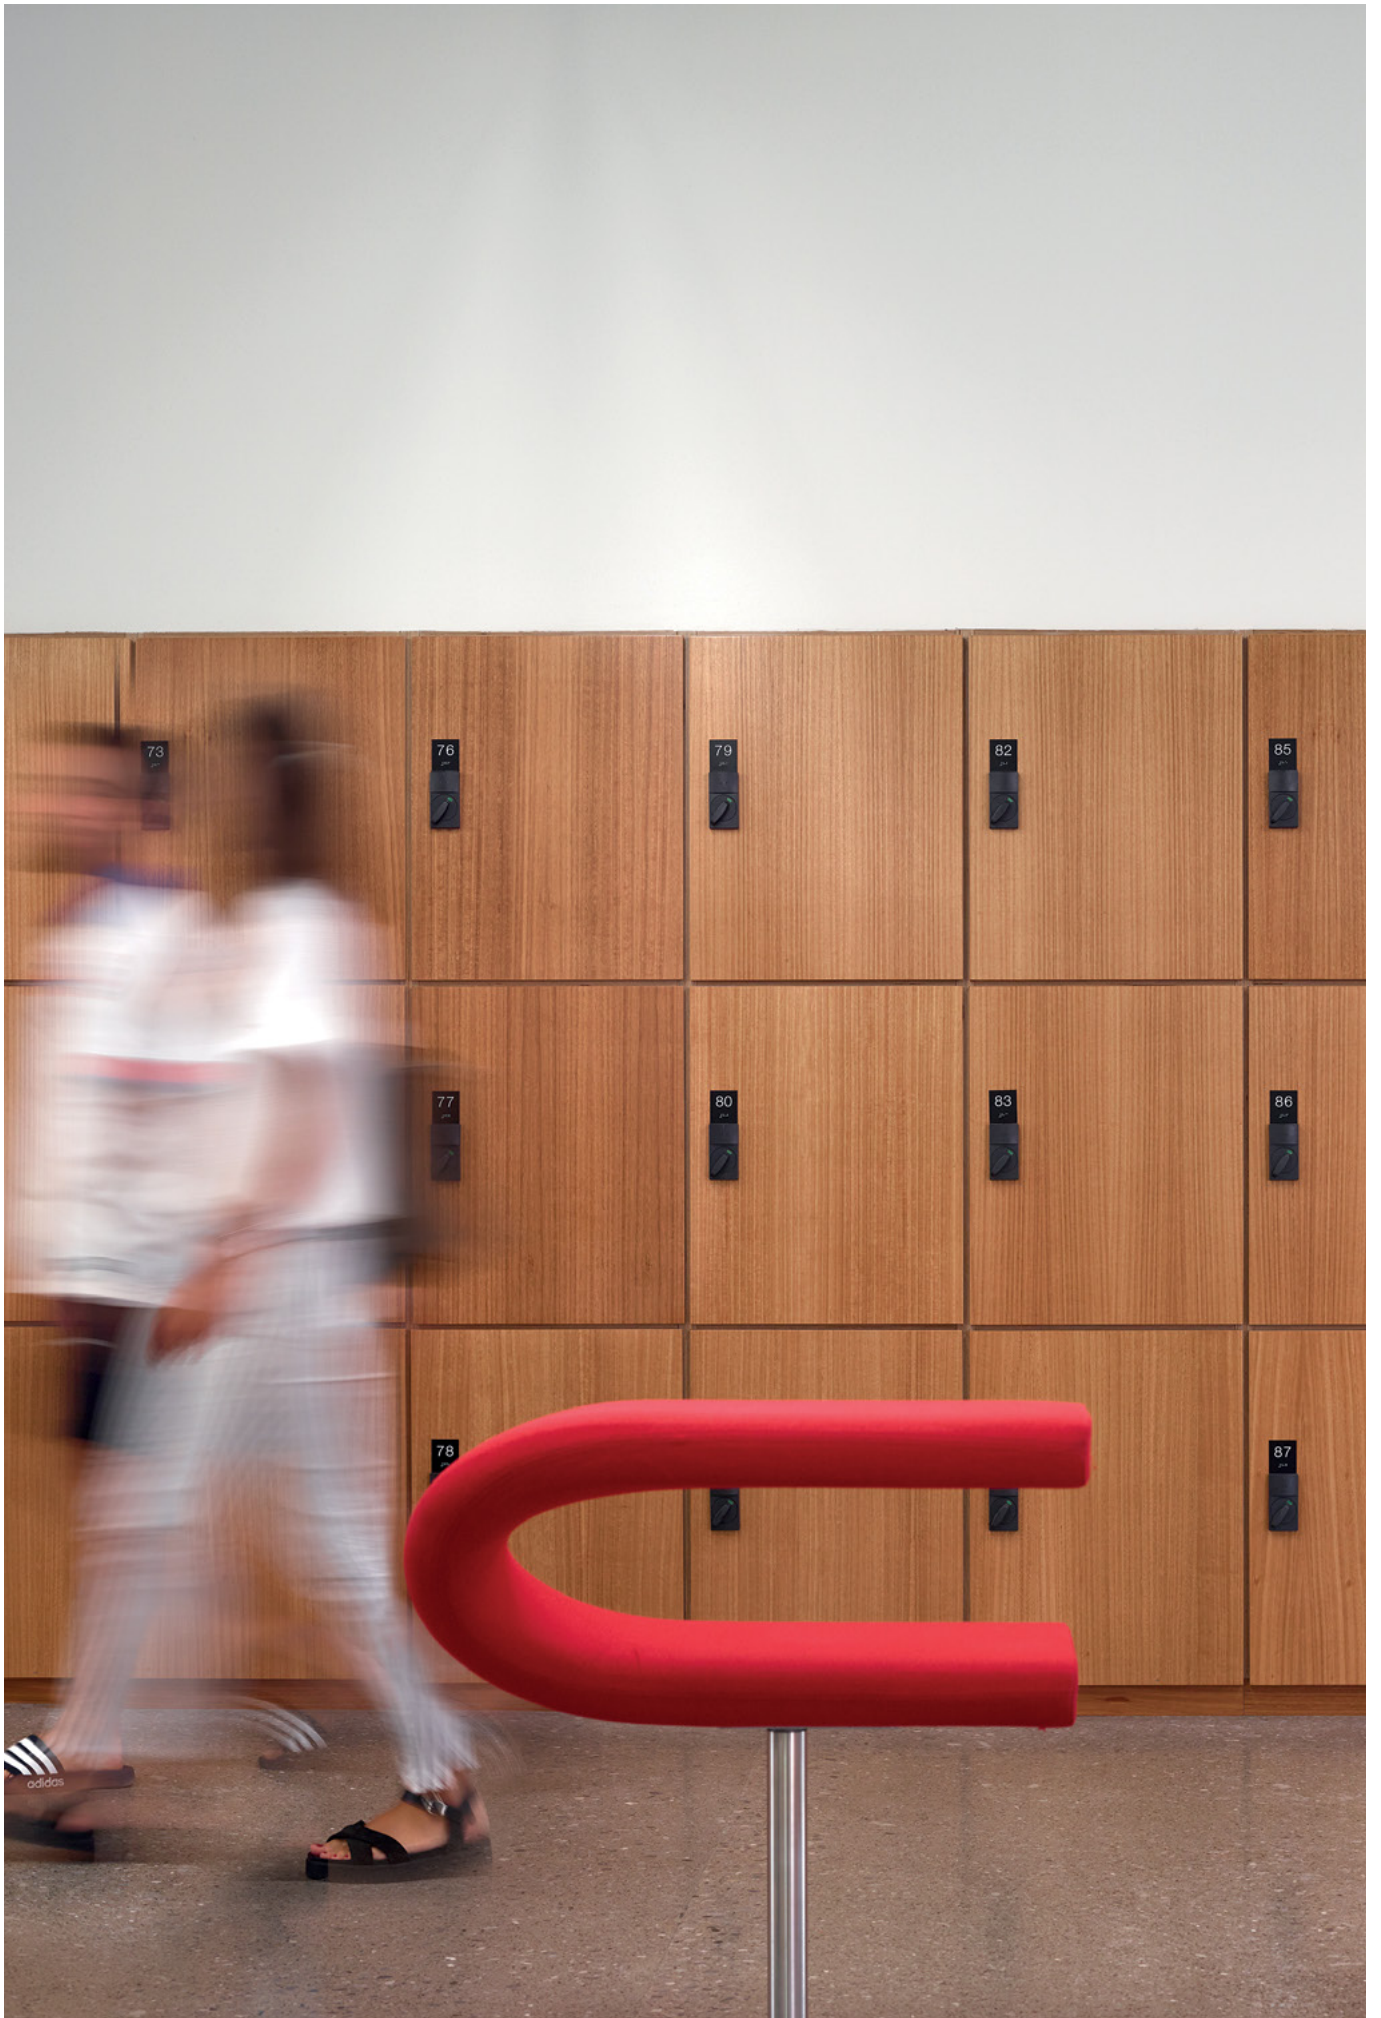

Wide range of models: European profile cylinder, UK oval profile cylinder, mortise cylinder, Swiss round profile cylinder, RIM exterior cylinder, Scandinavian profile cylinder, etc.

Communication between the carrier, the physical network, and the electronic cylinder is encrypted and secured.

Battery-operated cylinders. Tested up to 110,000 operations on a standard set of batteries (4 x LR1). Low battery status information is obtained from users' keycards (SVN) or wirelessly (BLUEnet).

Models for both inside and outside use available. Outside models are IP66 rated to endure the elements like water and dust.

Wide range of finishes and reader colours: Satin chrome, polished chrome, polished bright brass (PVD), satin brass (PVD), black satin. Available with antimicrobial BioCote® coating.

SALTO NEO SWING HANDLE

Compact and easy to install, SALTO Neo electronic cylinders are designed for the protection of cabinet doors such as IT racks or lockers and fit almost any type of swing handle server rack on the market.

SALTO NEO CAM LOCK

The SALTO Neo Cam Lock electronic cylinder is specially designed to fit most cabinets equipped with a cam locking mechanism.

LOCKER LOCKS

SALTO Locker Locks offer a safe storage environment at the touch of a mobile app or a keycard.

The SALTO electronic locker lock offers protection against theft to a wide range of lockers, cupboards, display cabinets etc. by integrating it into the SALTO wire-free electronic access solution.

Easy to install in any type of locker, their ergonomic design and durable wipe clean construction offers state-of-the-art electronic access control technology for many markets including coworking spaces.

MAIN FEATURES AND BENEFITS

Simple installation possible on many types of small and thin doors. Locker door thickness and handing adaptable on site.

Advanced core technologies: SALTO SVN, BLUEnet Wireless network and JustIN Mobile capable.

Communication between the carrier, the physical network and the electronic lock is encrypted and secured.

Battery-operated lockers. Low battery status information is obtained from users' keycards (SVN) or wirelessly (BLUEnet).

Outer thumbturn with red/green indicator indicating the availability of the locker, release managed electronically.

OPENING MODES:

— **Fixed locker assignment:** A specific user ID keycard operates a specific locker lock.
— **Free locker assignment:** Any user ID keycard subsequently used to unlock a locker takes control.
— **Family option:** Multiple user ID keycards to operate a single locker lock.

XS4 LOCKER

Designed to bring all the advantages of an electronic access control for lockers and cabinets. Perfect for controlling access to lockers, cupboards, cabinets, boxes and show cases, where access control and full audit trailing are required.

WALL READERS & DOOR CONTROLLERS

CUTTING-EDGE ONLINE ACCESS CONTROL SYSTEM

SALTO offers a wide range of wall readers that, in combination with SALTO KS door controllers, enable the expansion of SALTO access control benefits to doors where a stand-alone electronic lock cannot be fitted, i.e., barriers, lifts, sliding doors, or electronic gates, where control must be boosted by online real-time access control.

It offers a large number of models, wall reader, mullion wall reader for narrow profile frames, or panel readers to implement on intercoms, etc.

MAIN FEATURES AND BENEFITS

Designed to fit standard electric boxes, making the installation quick and easy.

Modern design with clear LED signaling, includes latest electronics and is completely sealed and designed for heavy-duty outdoor use.

Communication between the carrier, the physical network, and the reader is encrypted and secured.

For outside use — IP66 rating. Reader is housed in a two-piece, weatherproof secure electronics potted enclosure.

Wide range of finishes and reader colours: Black and white finishes; conical or flat square shape with rounded corners.

DESIGN XS READER

The SALTO KS Wall Reader incorporates the cutting-edge design standard in this technological powerhouse.

DESIGN XS MULLION READER

The SALTO KS slim wall reader for flush mounting has been specially designed to fit lifts, sliding doors, or electronic gate doors that have a narrow profile frame, and where there is insufficient space to install a standard wall reader.

PANEL XS READER

Designed to be integrated behind lift panels, door intercoms, electric switches, or turnstiles and gates. These models need a window nearby, which is necessary for reader antenna operation.
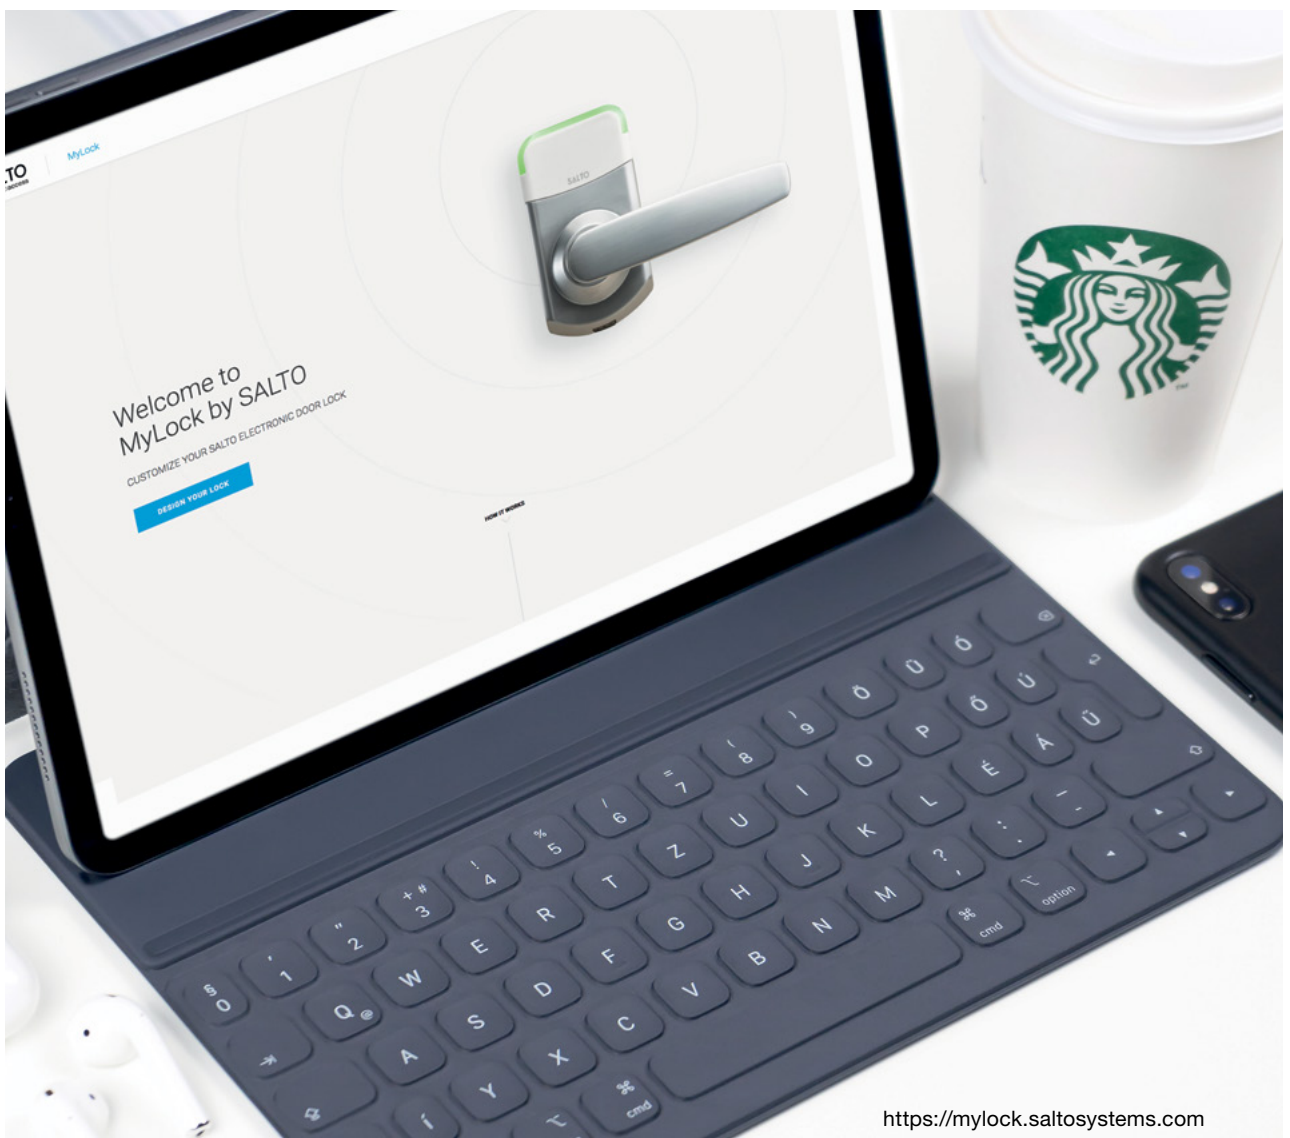

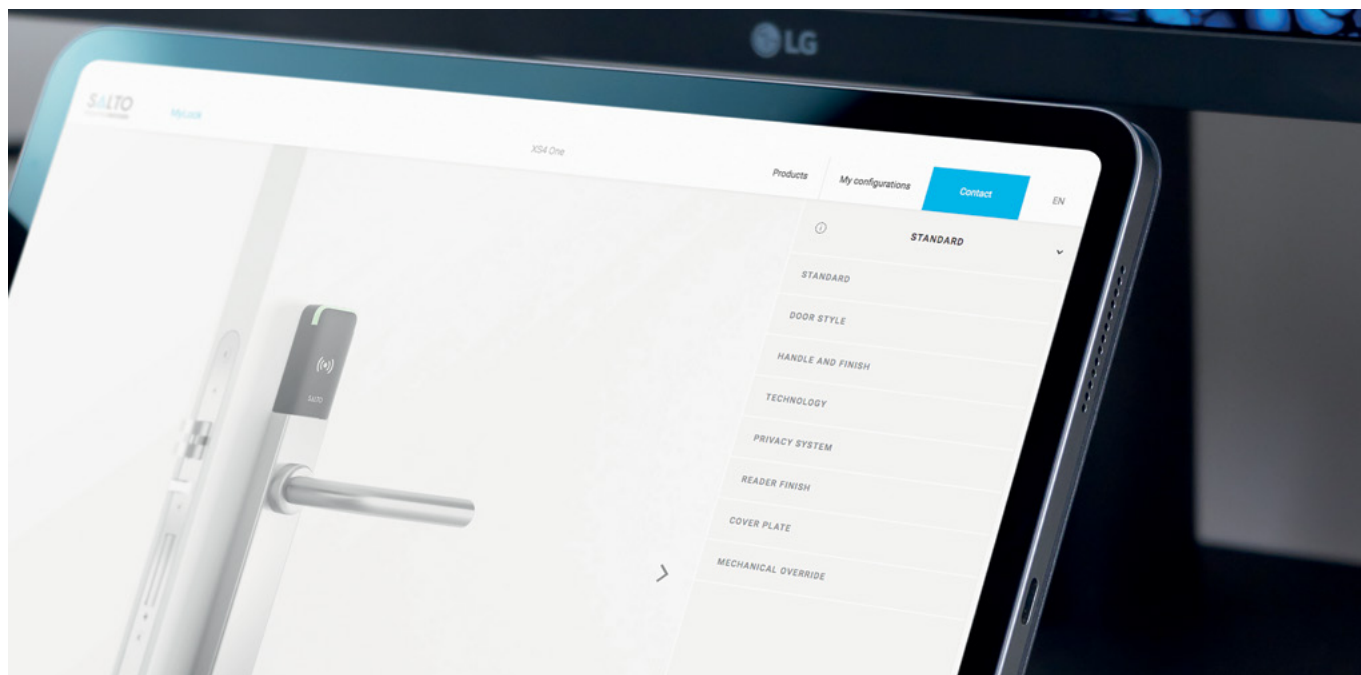

BUILD YOUR OWN DOOR

CUSTOMIZE YOUR ELECTRONIC SMART DOOR LOCK

Select an electronic smart lock model and door type and customise your SALTO door lock with a range of colours, finishes, and handle options with the SALTO MyLock configurator.

The innovative MyLock tool allows for complete visualization and customization of the locking solutions chosen by the user. By accessing the webpage, the user is able to select the door lock model online to configure and create a customised door by personalising everything.
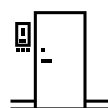

https://mylock.saltosystems.com

CHOOSE YOUR ELECTRONIC SMART LOCK MODEL

Choose your favorite electronic smart lock model (ANSI, Euro, or Scandinavian standards) to create your customised door and personalise everything.

CHOOSE YOUR DOOR TYPE AND SELECT A HANDLE DESIGN

Choose a door type, finish, handle design, and lockset finish that match your working space.

DOWNLOAD AND SAVE YOUR SETTINGS

Once the door configuration is complete, you can store and compare it against previously-configured door lock models or save it as a PDF.
